Parts Photo

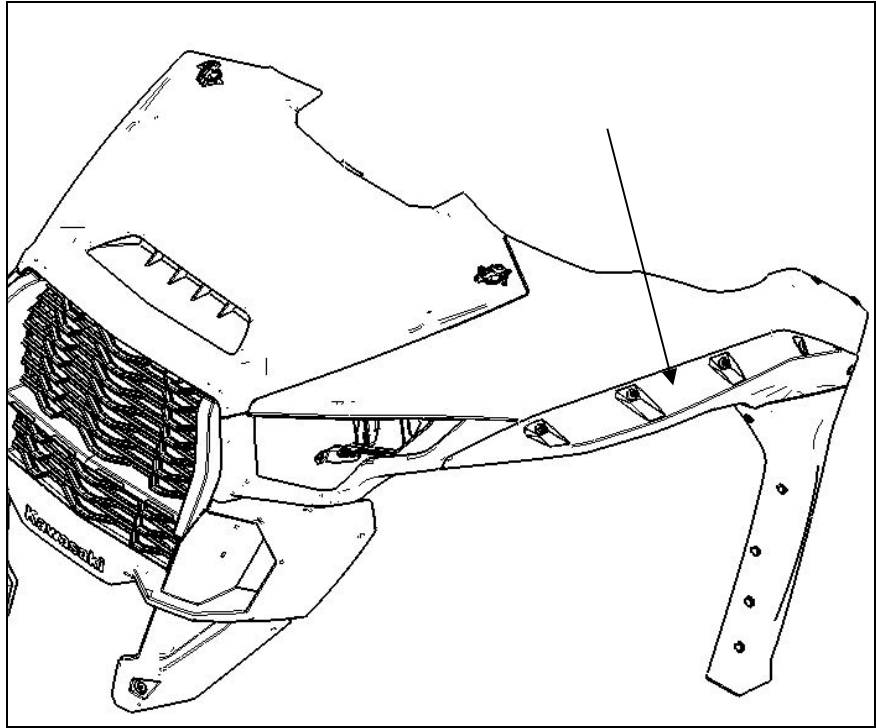

## Installation Instructions

- Park the vehicle on level ground, set the parking brake, and turn off the ignition switch.
- Fix the visor (2) to the ROPS using the cap bolts (4), large washers (13), spacers (6), washers (9) and cap nuts (8).

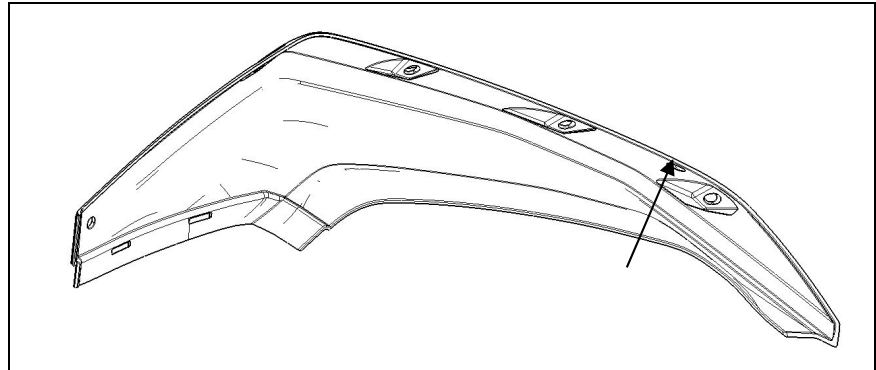

## Installation Instructions

- Remove fender flare from driver side as described in service manual.

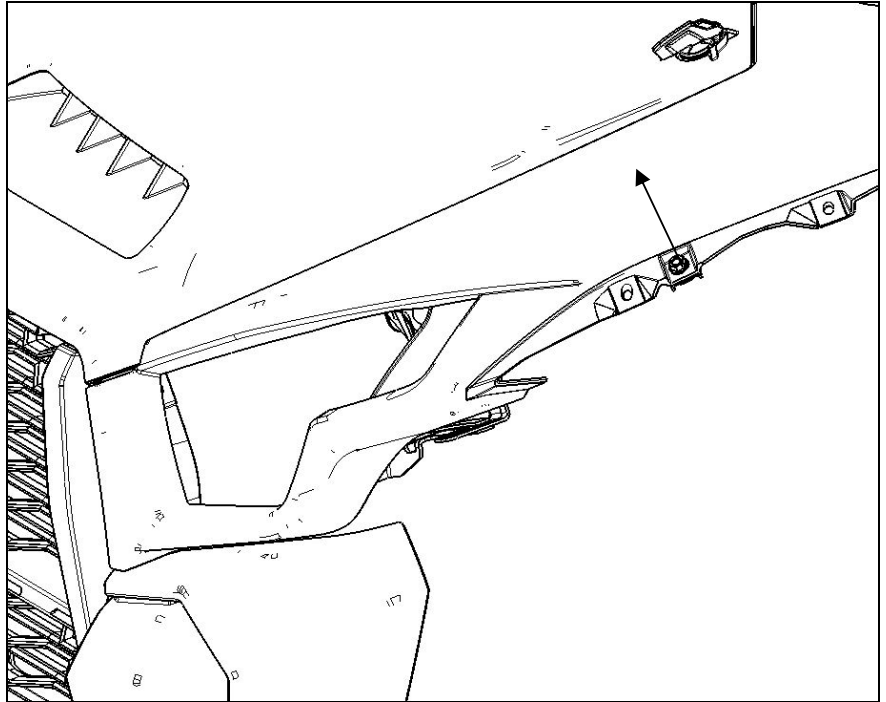

- Drill 1/2" diameter hole using the drill mark on the bottom side of the fender flare (Arrow).

## Installation Instructions

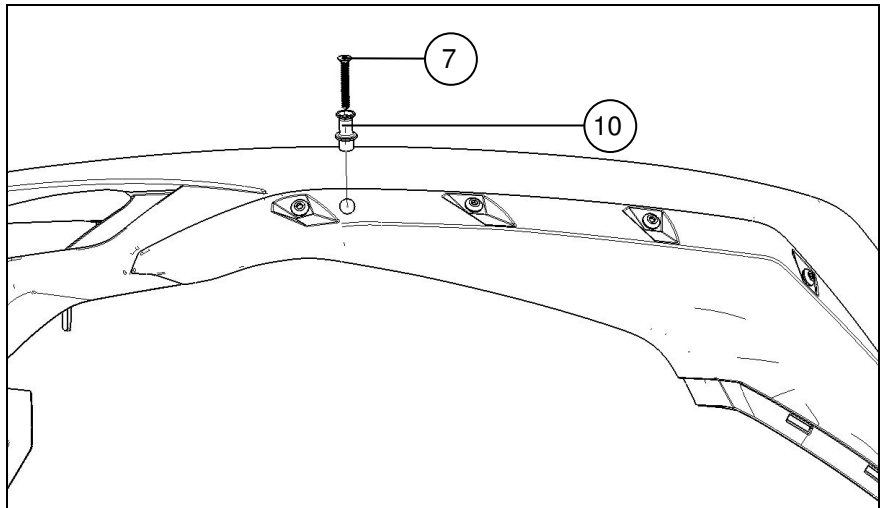

- Remove bolt holding fender in place.

- Reinstall fender flare

- Install fender latch post (10) using bolt (7).

- Repeat for passenger side

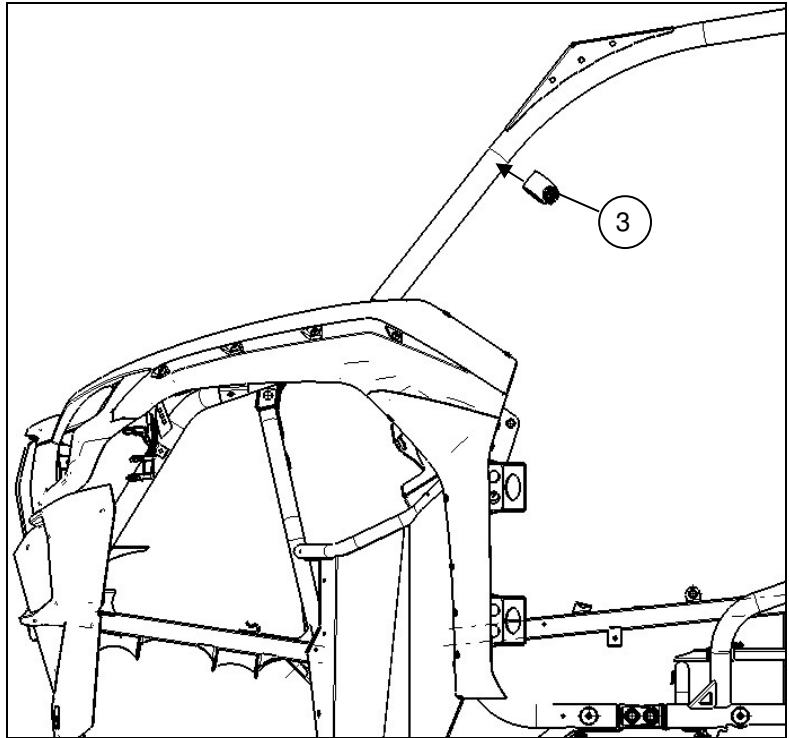

## Installation Instructions

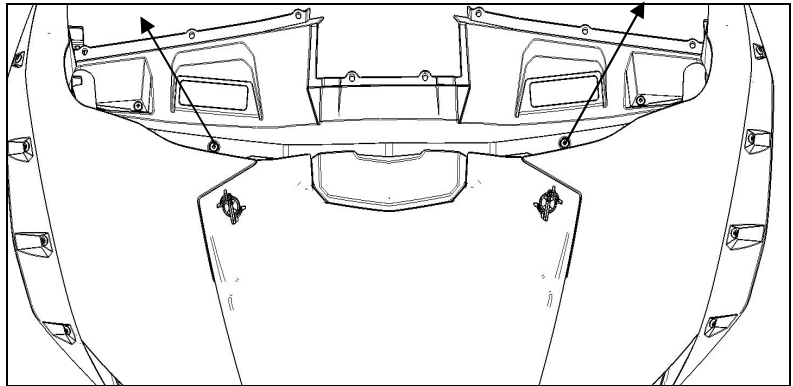

- Install the clamp assembly (3) directly on to the ROPS in the approximate position where the fastening strap will be in.

### NOTE

- *Leave the clamp buckle loose so clamps can move in place when attaching to ROPS.*

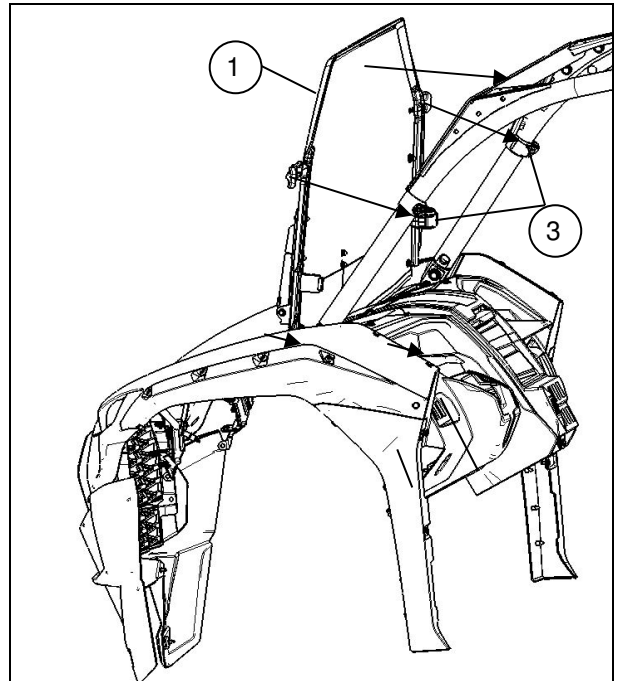

- Remove the two screws holding cowl panel in place (Arrows).

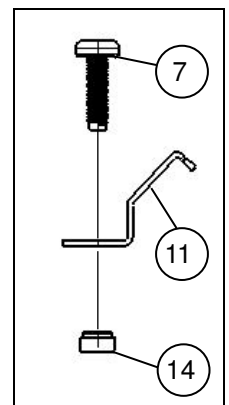

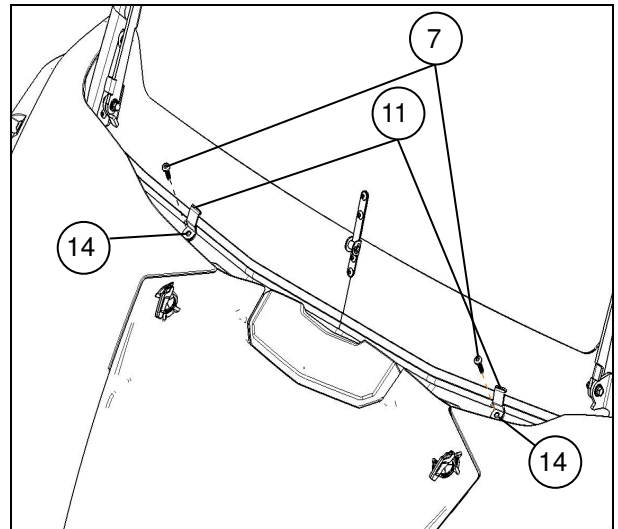

## Installation Instructions

- Install the windshield as shown. Fasten the straps on the windshield to the clamp assembly (3). Buckle lower windshield clamps to ROPS tube.
- Make sure lower seal has good contact with cowl surface.

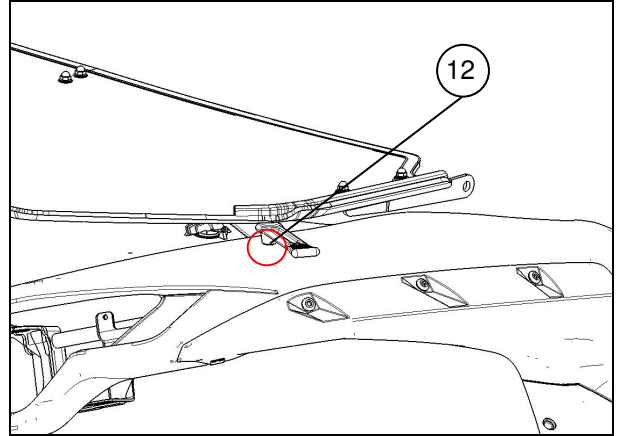

- Install lower retaining bracket (11) using bolt (7) and collar (14). Two places.

## Installation Instructions

- Loosen and adjust clamp assembly (3) as needed for final adjustment.
- Put windshield in down position. Note the location where the rubber latch strap contacts the fender. Clean the plastic in this location, and apply protective sticker (12).

### **⚠️ WARNING**

**During transport of vehicle, on trailer or by another unenclosed method, the vehicle MUST be in a forward facing position with the windshield closed. Failure to orient the vehicle in a forward facing position with the windshield closed could result in the windshield detaching from the vehicle during transport.**

### **⚠️ WARNING**

**Drive at 50mph or less when the windshield is open, or the windshield may become detached during use, resulting in injury.**
